About Me

I'm **Ali**, a **self-taught** Front-End developer who loves to learn new things. I am from **Iran**.
I became familiar with **JavaScript** and chose it to continue **My Way** as a **front-end developer,** and I found that I was **more interested** in this language.
After learning HTML, CSS, and JavaScript, I learned the **React library** and I am currently working as a front end developer. I love my job. Because nothing helps to learn more than doing a project. I did a lot of small personal projects, some of which you can see in the **portfolio** section of my personal website.
I like to learn more and do more every day and I think everyone can achieve their dreams if they want to.
I'm **hard-working**, **super curious**, **passionate**, **committed**, and also a **fast learner**!

My current **stack** of **languages** or **technologies** is:
HTML-CSS-SASS-JAVASCRIPT-REACT JS-REDUX-FIREBASE-BABEL-GIT

EXPRIENCE

Front-End Development, Freelancer

Apr 2020 - Present

Neyshabour, Iran
